Cosmic cosmic satellite, strike and fight,
laser light

Cosmic cosmic satellite, strike and
fight, laser light

Shot tonight, Target nullified, Gyro
sub-divide

Latitude, longitude, satellite solid
substitute

Latitude, longitude, satellite solid
substitute

Cosmic quake, gonna mistake, gonna
take take take take

Rapid scan radian, manoeuvres to
pre-program

Rapid scan radian, manoeuvres to
pre-program

Binary stars, seen from afar,
frequencies exploding star

Cosmics fly they symbolise
In myth and saga breathing fire
Look up, there's one flying higher

Who's there?

I'm not here

Why don't you just disappear

I found these lyrics in a book, but
they were not written by me. Could be
used for Space Trekin?:

I don't think I like this place
I think I come from outer space
I don't think I like my face
I want to live in outer space

I don't think that I can look at you
I think I come from Timbuctoo
I hope you see my point of view
I hope you see what I have to do

I've got to do something soon
I think I'm living on the moon
Everything round here is ruined
I think I'm living on the moon
